

We know that shopping for furniture can sometimes be a time consuming and overwhelming experience.

In order to help simplify the process, we have put together a checklist of quality construction features and details that we use to create our furniture.

We are more than happy to discuss these features in detail with you. We encourage you to "kick the tires" so that you are fully convinced that the furniture you select for your home is made with integrity and will last a lifetime.

Please feel free to take this checklist as you do your shopping in other stores.

Thank you. Your friends at McKinnon Furniture.

SHOPPING CHECKLIST - QUALITY FEATURES
